

DETERSOL

HIGH-EFFICIENCY DETERGENT AND DESCALER FOR WINE VESSELS, CASKS AND WINEMAKING EQUIPMENT

GENERAL FEATURES

DETERSOL is a suitably titered mixture of sulphur dioxide in sulphuric acid and surfactants featuring unparalleled safety and effectiveness.

APPLICATIONS

DETERSOL is ideal for ensuring general cellar hygiene, and for cleaning and washing concrete tanks, vats, casks, wine vessels and winemaking equipment. The product can also be used as a filler to ensure good cask care. Especially effective for treating tainted containers smelling of mould or rot, and wine vessels that smell sour or vinegary, for which routine cleansing treatments are insufficient. DETERSOL is also an effective scale remover for concrete tanks, and can eliminate red wine stains from barrels.

DOSAGE

Use a 1-2% solution for preparing new casks and for routine cleaning of equipment and barrels

Use five liters of 1% strength solution per 100 liter capacity to treat tainted vessels and wine-stained casks, barrels and vats.

INSTRUCTIONS FOR USE

Always pour DETERSOL into cold water, and never vice versa. The DETERSOL solution can be used by filling the containers and leaving to stand or rubbing the stains or scale. The duration of treatment and number of treatments required depend on the type of application. Rinse well after treatment. DETERSOL is even more effective when used after SANATON. When treating tainted casks, barrels and vats, avoid sanitizing with sulphur dioxide (SPRAY or DISCHI ZOLFO tablets) after using DETERSOL.

PACKAGING AND STORAGE

1 kg bottle

Keep the product in a fresh, dry, well-ventilated area.

Product approved for winemaking, in accordance with:
CE 1493/99
