

STABILIZING AGENT

ENARTISGREEN GOMMA VEREK

Certified organic gum arabic produced in accordance with Regulations (EC) No. 834/2007 and No. 889/2008

	<p>COMPOSITION E 414 Gum Arabic Verek.</p>
	<p>GENERAL CHARACTERISTICS Pure Acacia verek, EnartisGreen Gum Verek undergoes a simple process of solubilization and purification by filtration, aimed at eliminating the coarse impurities in the raw material and keeping the original size and structure of the gum virtually intact. In fact, doing so results in a gum that is extremely effective in preventing precipitation of the coloring matter in red wines.</p>
	<p>APPLICATIONS Stabilization of coloring matter of finished red and rosé wines, ready for bottling.</p>
	<p>DOSAGE 10 – 20 g/hL or more depending on the stability of the coloring matter. Prior laboratory testing is recommended to determine the correct dose for use, stabilizing efficacy, and impact on filterability.</p>
	<p>INSTRUCTIONS FOR USE Dissolve one part EnartisGreen Gomma Verek in 10 parts clear, perfectly filtered, ready-to-bottle wine. Once dissolved, add homogeneously to the mass to be treated. Use the solution thus prepared on the same day. Caution: adding EnartisGreen Gomma Verek before microfiltration can cause clogging of the cartridges. At higher dosages, it is recommended that it be added after microfiltration using an automatic dosing device. In case you do not have an in-line dosing device, it is recommended to assess beforehand the impact of gum addition on wine filterability.</p>
	<p>PACKAGING AND STORAGE CONDITIONS 1 kg Sealed package: store the product in a cool, dry and ventilated place. Open package: re-seal carefully and store as indicated above.</p>
	<p>COMPLIANCE Product based on raw materials complying with: Codex Œnologique International Regulation (EU) No. 848/2018 Product for oenological use in accordance with: Regulation (EU) 2019/934 and subsequent amendments Regulation (EU) 2021/1165</p>
