

CLEANING

SECO BRETT

Detergent specifically designed for cleaning containers contaminated by *Brettanomyces*

COMPOSITION

Alkaline product in powder form.

GENERAL CHARACTERISTICS

Seco Brett is a detergent specifically designed for cleaning tanks and barrels contaminated by *Brettanomyces*.

Contamination by *Brettanomyces* is a widespread problem in wine industry and it is the main cause of the formation of volatile phenols.

Wine container cleaning and sanitization with a very specific product is absolutely necessary to avoid this problem and produce wine not affected by volatile phenols.

APPLICATIONS

Cleaning of tanks, pipes, filling machines, containers and, specifically, wooden casks and barrels.

DOSAGE AND INSTRUCTIONS FOR USE

Application	Concentration of the solution %	Temperature of the solution °C	Contact time minutes	Notes
Tanks	1	60	10 minimum	
Pipes	1-2	40-60	10 minimum	Temperature must be appropriate for the treated material
Filling machine	1-2	40-60	20 minimum	
Wooden casks & barrels	3	room	30 minimum	

Cleaning of tanks:

- Rinse tank with water for 5 minutes.
- Circulate the solution prepared as indicated in the above table.
- Rinse with water to waste for 5-10 minutes until no chlorine remains. Alternatively, after rinsing with water for 5 minutes, wash with a solution containing 0.1% of potassium metabisulfite for 15 minutes then rinse again with water.

Cleaning of barrels and wooden casks:

- Rinse with water.
- Fill the container with a 3% solution of Seco Brett. Do not prepare the solution in the barrel.
- Leave the solution in contact with wood for 30 minutes.
- Empty the container. The cleaning solution can be reused 2 or 3 times within the same day. Attention: chlorine content must stay above 300 ppm.
- Rinse with water, then wash with a 0.1% potassium metabisulfite solution for 10 minutes. Finally rinse again with water.
