

**SULFITING AGENTS**

**ZOLFO DISCHI**

	<p><b>COMPOSITION</b> Sulphur, bentonite, calcium stearate.</p>
	<p><b>GENERAL CHARACTERISTICS</b> Zolfo Dischi (Sulphur Discs) is produced from pure sulphur powder using a special process that allows regular and uniform combustion of the sulphur, with no ash formation and no production of hydrogen sulphide.</p>
	<p><b>APPLICATIONS</b> Zolfo Dischi is indispensable for the disinfection, sanitization and remediation of wooden barrels of all sizes, as a complement to previous detergent treatments (Sanaton and Detersol), or during dry storage of cooperage. Zolfo Dischi can be used for the treatment of barrels as an alternative to sulphur dioxide spray.</p>
	<p><b>DOSES</b> One tablet of Zolfo Dischi produces about 11.5 g of SO<sub>2</sub> and consumes the oxygen present in 20 litres of air.</p>
	<p><b>METHOD OF USE</b> Place Zolfo Dischi on a wire bent into the shape of a hook. Set fire to it and insert it into the top of the barrel or vessel, hooking the iron hook onto the bung or hatch.</p>
	<p><b>PACKAGING AND STORAGE CONDITIONS</b> 1 kg Unopened package: store the product in a cool, dry and ventilated place. Open package: seal carefully and store as above.</p>
	<p><b>COMPLIANCE</b> Product made from raw materials that conform to the characteristics required by the: Codex Œnologique International Reg. (EU) N. 231/2012  Product approved for winemaking, in accordance with: Reg. (EU) 2019/934 and subsequent amendments  Product approved for winemaking by TTB under 27 CFR 24.246</p>
