

COMPANY PROFILE

About Enartis

Enartis was founded in 2003 as part of the distinguished Esseco Group, a fourth generation, family-owned company. The companies of Esseco Group have been developing safe, high-performance products in the fields of inorganic chemistry and enology for nearly a century.

Enartis boasts a long tradition as being one of the leading international players in the industry for winemaking products, improving winery processes, and offering comprehensive technical support and customer service.

Enartis is proud to have cultivated enduring relationships with over 10,000 manufacturers in 50 countries, providing wineries and winemakers with unparalleled innovation and expertise to improve wine quality and winery processes.

Our Beliefs

Our Mission is to provide wineries worldwide with innovation and expertise through enological products and technical support to improve both winery efficiencies and wine quality. We achieve our mission by maintaining certified standards of operation, ongoing research and development, quality relationships with customers and vendors, and the health and wellbeing of our employees.

Our Team

Our approach is to share knowledge, expertise and experience gained through working with winemakers across five continents. Our culture is founded on the principle of treating our employees in the same manner as we do our customers.

Accreditations

To ensure that we provide consistent quality products and services, we are accredited with the following standards: ISO 14001 2015, ISO 9001 2015, OHSAS 18001, FSSC 22000 Certification.

As evidence of our compliance with national and international regulations, we can provide non-GMO, animal origin, allergen and Kosher declarations.

What We Do

The company's focus is providing innovative products to the global market to improve and enhance the quality of wine. Our products result in optimized efficiency and costs savings throughout the winemaking process.

To date, we have introduced more than 300 specialized products, including yeast, tannins, enzymes, fermentation nutrients, bacteria, stabilizers, and clarifying and fining agents.

Our Ongoing Commitment

We have an ongoing commitment to applied research and development by investing over 2 million euros every year to develop the latest innovative products, solutions and technical support. We utilize the resources of our team, universities and numerous wineries around the world in our commitment to create new products to ensure that we can satisfy our customers' requirements.

We have developed valuable synergies over the years with wine growers and producers in countries with strong winemaking traditions such as Italy, Spain, Portugal, Central Europe, USA, Argentina, Chile, Australia, New Zealand and South Africa.
