ENARTIS PRODUCTS AUTHORIZED FOR THE PROCESSING OF CERTIFIED ORGANIC WINES IN ACCORDANCE WITH EUROPEAN AND / OR NOP REGULATIONS.

This document lists the Enartis products that can be used to produce organic wines certified according to European regulations (Reg. (EU) 2021/1165 - Reg. (EU) 848/2018 and subsequent amendments) and for the US regulation NOP (National organic program).

The table below corresponds to our best interpretation of EU and NOP regulations. Before using any products in certified wines, it is absolutely necessary to verify compliance with your Certification Body (e.g. by showing technical data sheets), in order to evaluate any limits to obtaining the BIO certification [Reg. (EU) 2021/1165 - Reg. (EU) 848/2018 and subsequent amendments] or the NOP (National Organic Program) Certification.

This list is provided for informational purposes only and is subject to periodic review. Make sure you are using the latest revision (www.enartis.com)
