

# HARVEST EMERGENCY TOOL KIT

## Rapid Solutions for Common Harvest Challenges

Harvest doesn't wait, and neither should your winemaking solutions. Whether you're understaffed, dealing with underripe fruit, or troubleshooting mid-fermentation, this kit gives you fast, effective tools to stay on track. Below, learn when and how to use each product, and how to amplify their impact with smart synergies.

### [NUTRIFERM ULTRA](#)

**Why it's in the kit:** Granular, organic nutrient with ideal amino acid profile for smooth, strong fermentations. No rehydration = no delay. Perfect when resources are stretched.

**Pro tip:** Combine with [EnartisFerm 488](#) to reinforce yeast vitality from the start.

### [NUTRIFERM NO STOP](#)

**Why it's in the kit:** Restart stuck or sluggish alcoholic fermentation. Delivers the nutrients and detoxification agents yeast need to recover.

**Pro tip:** Use at 1/2 sugar depletion or at early signs of lag to prevent full stalls. Pair with [EnartisStab MICRO M](#) to cover all potential causes of stuck AF.

### [EnartisFerm 488](#)

**Why it's in the kit:** For underripe grapes; green and vegetal aroma reduction. Easytech certification means that rehydration is optional, saving time and labor. Low producer of VA, SO<sub>2</sub>, H<sub>2</sub>S, acetaldehyde, and guaiacol.

**Pro tip:** Combine with [INCANTO NC RED](#) or [INCANTO NC DARK CHOCOLATE](#) for even better results with underripe fruit.

### [EnartisStab MICRO M](#)

**Why it's in the kit:** Pre-activated chitosan to control unwanted microbes while leaving *S. cerevisiae* to thrive. Broad-spectrum antimicrobial action prevents unwanted organisms from taking over.

**Pro tip:** Use anytime, from grape receipt to bottling, to get rid of spoilage microbes.

### [CLARIL SMK](#)

**Why it's in the kit:** Fining agent blend that targets volatile phenols, molds, and other faults. Remove smoke taint and clean up off-aromas in juice or wine.

**Pro tip:** Negligible impact on color and phenolic content, even at high addition rates.

### [EnartisTan ELEVAGE](#)

**Why it's in the kit:** Tannin that binds mercaptans and eliminates sulfur off-aromas. Adds mouthfeel and aromatic complexity.

**Pro tip:** Use to prevent or treat reduction. Combine with [HIDEKI](#) to bind disulfides. For more Enartis tannins, including HIDEKI, check out the [Enartis Sensory Improvement Kit](#).
